Orford Mining Corporation

Notes to Condensed Interim Consolidated Financial Statements

Three Months Ended March 31, 2021

(Expressed in Canadian Dollars Except As Otherwise Indicated)

1. Nature of operations and going concern

Orford Mining Corporation ("Orford") is incorporated under the Business Corporations Act (Ontario) and its registered office is located at 2 St.Clair Avenue West, 18th Floor in Toronto, Ontario, Canada. Orford's common shares are listed on the TSX Venture Exchange under the ticker symbol "ORM".

The consolidated financial statements of the Corporation comprise the accounts of Orford and its wholly-owned subsidiary, Condor Precious Metals Inc. ("Condor"). Collectively, these entities are referred to as the "Corporation".

The Corporation is a mineral resource company primarily focused on the acquisition, exploration and evaluation of base and precious metal assets. The business of mining and exploring for minerals involves a high degree of risk, and there can be no assurance that planned exploration and evaluation programs will result in profitable mining operations. The recoverability of amounts shown for mineral property interests is dependent upon several factors including, but not limited to, the discovery of economically recoverable reserves, confirmation of the Corporation's interest in the underlying mineral claims, obtaining the necessary development permits, and the ability of the Corporation to obtain necessary financing to complete further exploration and evaluation or, alternatively, upon disposition of such property at a profit. Changes in future conditions could require material write-downs of the carrying values of mineral property interests and property, plant and equipment.

The accompanying consolidated financial statements have been prepared using International Financial Reporting Standards ("IFRS") applicable to a going concern, which contemplates the realization of assets and settlement of liabilities in the normal course of business as they come due. In assessing whether the going concern assumption is appropriate, management considers all available information about the future, which is at least, but not limited to, twelve months from the end of the reporting period.

The Corporation had working capital of \$3,580,289 and an accumulated deficit of \$24,142,269 as at March 31, 2021 and incurred a loss of \$345,087 for the three months then ended. Working capital included cash and cash equivalents of \$4,032,096. These circumstances indicate the existence of material uncertainties that cast significant doubt upon the Corporation's ability to continue as a going concern and accordingly, the appropriateness of the use of IFRS applicable to a going concern. These consolidated financial statements do not reflect the adjustments to the carrying values of assets and liabilities, expenses and financial position classifications that would be necessary if the going concern assumption was not appropriate. These adjustments could be material.

The Corporation's ability to continue future operations and fund its operations is dependent on management's ability to secure additional financing in the future, which may be completed in a number of ways including, but not limited to, the issuance of equity instruments, expenditure reductions, or a combination of strategic partnerships, joint venture arrangements, royalty financing and other capital market alternatives. If management is unable to obtain new funding, the Corporation may be unable to continue its operations, and amounts realized for assets might be less than amounts reflected in these consolidated financial statements.

Commencing in March 2020, the outbreak of the novel strain of coronavirus known as "COVID19" has resulted in governments worldwide enacting emergency measures to combat the spread of the virus. These measures, which include the implementation of travel bans, self-imposed quarantine periods and social distancing, have caused material disruption to businesses globally resulting in an economic slowdown. Global equity markets have experienced significant volatility and weakness. Governments and central banks have reacted with significant monetary and fiscal interventions designed to stabilize economic conditions. The duration and impact of the COVID19 pandemic is unknown at this time, as is the efficacy of the government and central bank interventions. It is not possible to reliably estimate the length and severity of these developments and the impact on the financial results and condition of the Corporation. Specifically in Quebec, Canada, the area where the Corporation operates, most of the province was closed to mineral exploration until May 4, 2020, and the Nunavik region where the Qiqavik and West Raglan projects are situated remain closed until August 17, 2020.

5. Asset Retirement Obligation

The asset retirement obligation represents the legal and contractual obligation associated with the eventual closure and reclamation of the Corporation's exploration camp at the West Raglan and Qiqavik projects. The obligation consists of costs associated with reclamation, environmental monitoring, and the removal of tangible assets. As at March 31, 2021, the carrying value of the asset retirement obligation represents the net present value of the estimated undiscounted cash flows required to settle the environmental obligations, which total \$500,000 (December 31, 2020 - \$500,000), using an average discount rate of 0.6% (December 31, 2019 - 0.6%). The settlement of these obligations are estimated to occur in 2022.
