

Orford Mining

Corporate Presentation

TSXV: ORM, OTC: ORMFF
October 4, 2022

Disclaimer

Cautionary Statement Concerning Forward-Looking Statements

Neither the TSXV nor its Regulation Services Provider (as that term is defined in the policies of the TSXV) accepts responsibility for the adequacy or accuracy of this presentation.

This presentation contains "forward-looking information" including without limitation statements relating to the liquidity and capital resources of Orford and potential of one or more of the Qiqavik and West Raglan properties.

Forward-looking statements involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of Orford to be materially different from any future results, performance or achievements expressed or implied by the forward-looking statements. Factors that could affect the outcome include, among others: future prices and the supply of metals; the results of drilling; inability to raise the money necessary to incur the expenditures required to retain and advance the properties; environmental liabilities (known and unknown); general business, economic, competitive, political and social uncertainties; accidents, labour disputes and other risks of the mining industry; political instability, terrorism, insurrection or war; or delays in obtaining governmental approvals, failure to obtain regulatory or shareholder approvals. For a more detailed discussion of such risks and other factors that could cause actual results to differ materially from those expressed or implied by such forward-looking statements, refer to Orford's filings with Canadian securities regulators available on SEDAR at www.sedar.com.

Although Orford has attempted to identify important factors that could cause actual actions, events or results to differ materially from those described in forward-looking statements, there may be other factors that cause actions, events or results to differ from those anticipated, estimated or intended. Forward-looking statements contained herein are made as of the date of this presentation and Orford disclaims any obligation to update any forward-looking statements, whether as a result of new information, future events or results or otherwise, except as required by applicable securities laws.

The TSXV has neither approved nor disapproved the contents of this presentation.

Qualified Person and Quality Assurance and Quality Control

The disclosure of scientific and technical information contained in this presentation has been approved by Alger St-Jean, P.Geo, Chief Geoscientist of Orford, a Qualified Person under NI 43-101.

Samples reported in this presentation and indicated as grab, outcrop, sub-outcrop, boulders and float are grab samples. Grab samples are selective by nature and values reported may not be representative of mineralized zones. All drill intervals reported in this presentation are down-hole core lengths as true thicknesses cannot be determined with available information.

The work program at Qiqavik was supervised by Alger St-Jean, P.Geo, Chief Geoscientist who is responsible for all aspects of the work, including the quality control/quality assurance program. On-site personnel at the project log and weigh all samples prior to sealing and shipping. Sample shipments are sealed and shipped to Techni-Lab, Sainte-Germaine-Boulé, Québec. All gold assays reported were obtained by either 350-g screen fire assay or standard 50-gram fire-assaying-AA finish or gravimetric finish (method 1A2-5 and 1A3-50) at. The 350-g screen assay method is selected by the site geologist or the lab when samples contain coarse gold or higher percentage of sulfide mineralization that may be associated with gold relative to surrounding intervals. All samples are also analyzed for multi-elements, including copper and silver, using a four-acid method with an ICP-EOS and ICP-MS finish at Tech-labs affiliated Actlabs in Ancaster, Ontario. Overlimits were analyzed by peroxide fusion with ICP-EOS finish. Drill program design, Quality Assurance/Quality Control ("QA/QC") and interpretation of results is performed by qualified persons employing a QA/QC program consistent with NI 43-101 and industry best practices. Standards and blanks are inserted at a minimum of 10% and 5% for core and grab samples respectively for QA/QC purposes in addition to those inserted by the lab. A subset of samples has not yet been sent for a verification assay at another lab.

Techni-Lab Laboratory, is a subsidiary of Act Labs, is accredited (n. 707) by the Standards Council of Canada and found to comply with the requirements of ISO/IEC 17025:2005 (CAN-P-4E) and CAN-P-1579.

The technical information disclosed herein in respect of the Qiqavik Property is based on the independent report of Clement Dombrowski, P.Geo and Sylvain Desbiens P.Geo. titled "NI 43-101 Technical Report on Qiqavik Project, Northern Quebec, Canada" effective September 14, 2017, and on Orford Mining's press releases available on SEDAR. The information disclosed herein in respect of the West Raglan Property is based on the independent report of Clement Dombrowski, P.Geo. titled "NI 43-101 Technical Report on West Raglan Project, Northern Quebec, Canada" effective February 20, 2017.

Big Properties plus Big Grades equals Big Potential

Aprox. 1,400 sq kms of prospective land in six properties in Quebec Canada with 6,000 metres of drilling in 2022

Qiqavik Gold/Copper

- 395 sq kms
- 100% owned
- Drilled 2,720 metres
- Discovered several new Gold Bearing Quartz Carbonate vein and alteration system.
- Visible Gold in Core
- Majority of assays pending.

West Raglan Ni/Cu/PGM

- 713 sq kms
- 100% owned
- Wyloo Metals Earning in
- Drilled 2,589 metres
- Discovered new Ni/Cu/Au surface showing
- Hit Nickel Sulphides in a number of drill holes, assays pending.

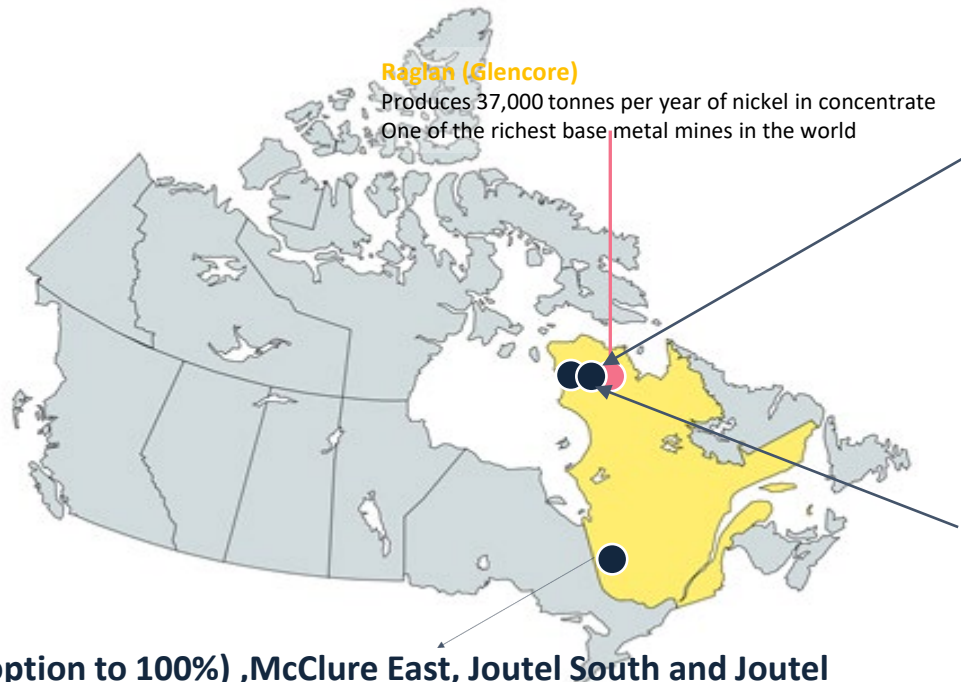

Joutel Regional Gold/Copper

- 260 sq kms
- 100% owned or option to own 100%
- 688 metres drilled
- Drilled the South Gold Zone on Joutel Eagle and discovered a thicker gold zone than previously known.

Project Portfolio –Large Regional Properties

2022 Will be the Biggest Year of Exploration Expenditures in our History

1,108 km² land position in the highly prospective and underexplored Cape Smith Belt and 260 km² in the heart of the Quebec Abitibi
Quebec is consistently viewed as one of the most attractive jurisdictions from a mining investment point of view

Joutel – Eagle (option to 100%) ,McClure East, Joutel South and Joutel Omega (Au) (100%)

- Located in the prolific gold mineralized Casa Berardi /Joutel Structures, in the heart of the Abitibi region (accessible by road)
- Area last saw exploration in the early 1990's,.
- Winter/Spring 2021 drilling program on the Joutel Eagle Option.
- Properties are the underexplored extension of the Joutel trend that hosted both Agnico-Eagle Mines Ltd.'s (AEM-T) founding gold mine Eagle/Telbel which produced in excess of 1.1Moz of gold and a number of copper assets that have produced 244 Mlbs of copper, 116Mlbs of Zinc and 52Mlbs of silver¹

Qiqavik Project (Au)(100%)

- Camp Scale Property with several multi ounce boulder trains such as the Annick Trend intersecting major structures such as the IP Lake Structural zone.
- The property is a previously unexplored part of the Cape Smith Belt
- New Potential Gold Camp with Opportunity to host multiple deposits
- \$4.0 million budget in 2022

West Raglan Project (Ni, Cu, PGE's)(100% Interest)

- Wyloo Metals Pty Ltd. has entered an earn in agreement with Orford to earn up to a 80% interest by spending \$25 million amongst other items.
- ~707 km² property in the lower Cape Smit Belt Covering the stratigraphy of the North (Raglan Trend) and South (Nunavik Nickel) ultramafic Trends
- Advanced Exploration: Traced outcropping sulphide mineralization over +35 km strike
- Frontier Zone: identified five high-grade (2-3% Ni, 3+ g/t PGE) mineralized lens clusters over a 2,500 m strike (comparable geology to Glencore's Raglan Mine)
- After a nearly \$2 million budget in 2021 completing MLTEM – SQUID to define targets, the 2022 program will consist of a \$4.9 million predominantly diamond drilling budget.

Royalties

- Owns a 3.5% NSR on the Falan property (Malabar Gold Corp.) and a 2% NSR on the Santa Ana property (Outcrop Gold Corp.) both in the Mariquita Silver district of Columbia. This district was one of Colombia's most prolific colonial silver camps.

1. (Système d'information géominière of Québec "SIGEOM", Quebec Ministry of Energy and Natural Resources. April 20,2020)

Corporate Snapshot

Capital Structure and Share Performance – Strong Balance Sheet

Capital Structure

Ticker	TSXV:ORM
Share Price (as of October 3, 2022)	C\$0.07
Basic Shares Outstanding ¹	164.53M
Options (@ average \$0.20 strike)	12.78M
Warrants (@ average \$ 0.23 strike)	27.76M
Fully Diluted Shares Outstanding	205.07M
Market Capitalization (Basic)	C\$11.53M
Cash ¹	C\$3.55M

1. Cash as of July 31., 2021, note that the company closed a \$2.4 million financing on August 8, 2022..

Management & Board of Directors

High Quality Exploration Team and Capital Markets/Mining Focused Board

David Christie
President, CEO, and Director

- Professional Geologist (in Ontario and NWT and Nunavut) with more than 35 years of experience in the resource sector
- Former Vice President with Goodman & Company Investment Counsel and Dundee Resources Inc.
- Former President, CEO, and Director of Eagle Hill Exploration and former mining research analyst at TD and Scotia
- Former Director of eCobalt Solutions Inc., Osisko Mining Inc. and Condor Precious Metals (private)

Cindy Davis
CFO

- Accounting professional with 18 years of accounting experience, 12 of which has been with Marrelli Support Services at a Senior Level. Registered as a CA and a CPA.

Alger St-Jean
Chief Geoscientist

- Professional Geologist (in Quebec and Ontario) with +25 years of experience in mineral exploration and development
- Currently Chief Operating Officer of Dumont Nickel – Magneto Investments LP
- Previously VP Exploration & director of Orford Mining, former VP Exploration of RNC Minerals (Karora Resources) and former Senior Geologist at Xstrata Nickel (formerly Falconbridge)

Michelle Sciortino
VP of Exploration

- Professional Geologist (in Ontario) with +14 years of experience in mineral exploration and development
- Previously Senior Project Geologist with RNC Minerals (Karora Resources), and Senior Geologist of Orford Mining

Peter MacPhail
Chairman

- Professional Engineer with over 25 years of operational experience
- Current Chief Operating Officer of Alamos Gold Inc,
- Former Chief Operating Officer of AuRico Gold

Lawrence Smith
Director

- +25 years of experience in investment management, equity research, and banking – MBA and CFA holder
- VP Portfolio Management and Research at CIBC Asset Management, Director of Equity Research at Scotia Capital and Blackmont Capital, and Project Manager – Corporate Development at Rio Algom Limited

John McCluskey
Director

- John McCluskey is the President and Chief Executive Officer (and director) of Alamos Gold Inc.
- and has held this position since 2003, when he co-founded the Company with mining hall of famer Chester Millar.
- Mr. McCluskey was formerly a Director of the World Gold Council and is currently an Alternative Director.
- Mr. McCluskey was the recipient of the 2018 Murray Pezim Award for Perseverance and Success in Financing Mineral Exploration by the British Columbia Association for Mineral Exploration. This award recognized Mr. McCluskey's role in the acquisition, financing, and encouragement of successive discoveries at Mulatos, as well as his ongoing success as CEO of Alamos.
- Mr. McCluskey was also named Ontario's 2012 Ernst & Young Entrepreneur of The Year, based on a judging panel's assessment of financial
- performance, vision, leadership, innovation, personal integrity and influence, social responsibility, and entrepreneurial spirit.

Mark Goodman
Director

- Former Executive VP and COO of Dundee Corporation and Chairman of Dundee Sustainable Technologies
- Previous CEO of Ryan Gold, Valdez Gold, Cogitore Resources, a base metal exploration company in Northern Quebec

Ben Pullinger
Director

- Professional Geologist (in Ontario) with over 17 years of exploration and mining experience
- Currently Senior Vice President Exploration and Business Development at ATEX Resources Inc.
- Former Executive Vice President of Geology at Golden Star Resources Ltd.
- Former Senior Vice President of Geology and Business Development at Excellon Resources Inc.
- Former Vice-President Exploration at Roxgold Inc.

Monique Rabideau
Director

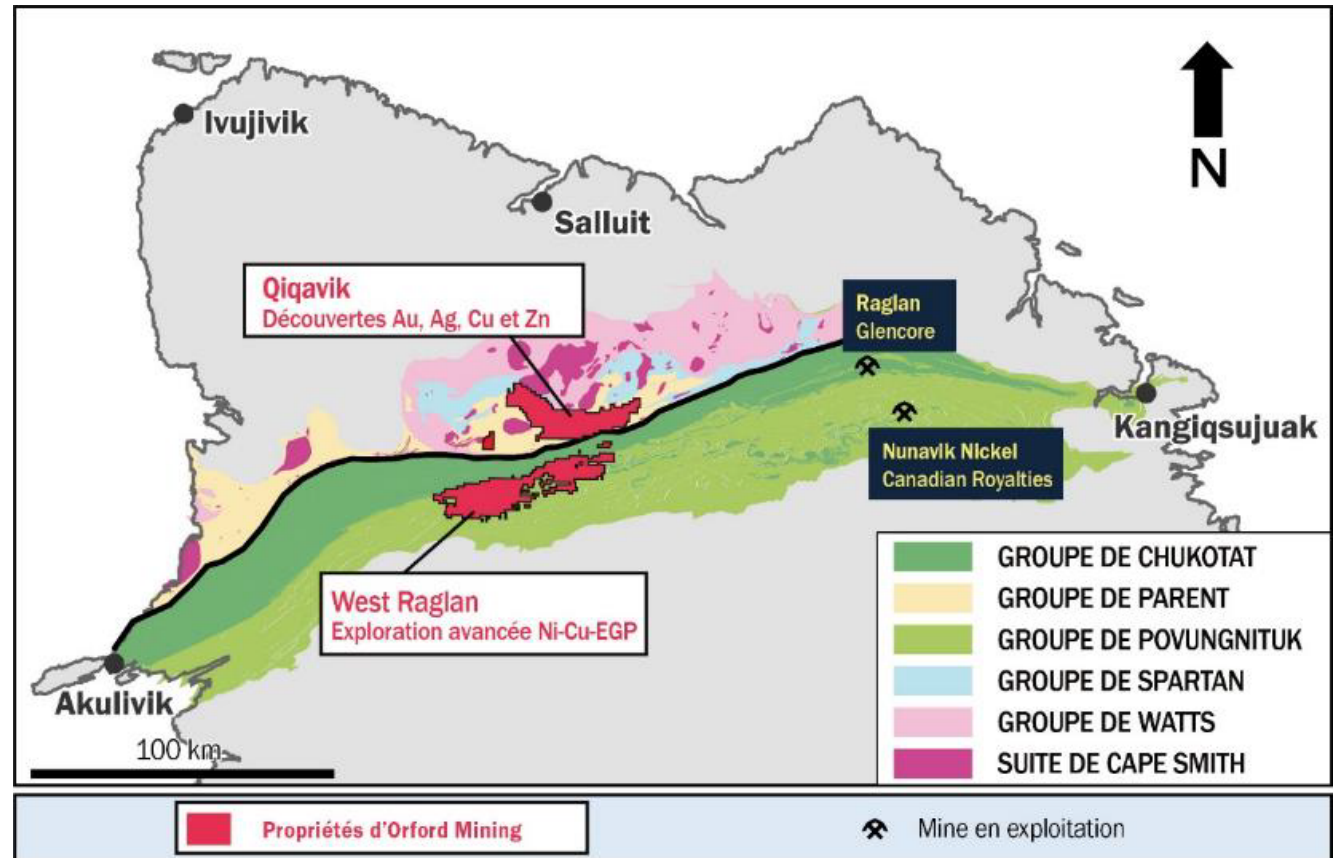

- Monique is the Practice Lead, Capital Markets and Securities for Practical Law Canada at Thomson Reuters. Previously with Fogler, Rubinoff LLP, a full service law firm in Toronto where she practiced for 22 years in the business law dept.
- Chair of the Board of the Dancer Transition Resource Centre.
- Graduated magna cum laude from McGill in 1988 then obtained her Juris Doctor from the University of Toronto in 1991
- Monique was previously a director of eCobalt Solutions Inc.

Qiqavik Gold Project

Large, Highly Prospective Land Package in an Underexplored Emerging Gold District

40-km long Qiqavik property remains largely unexplored with potential for multiple large gold deposits

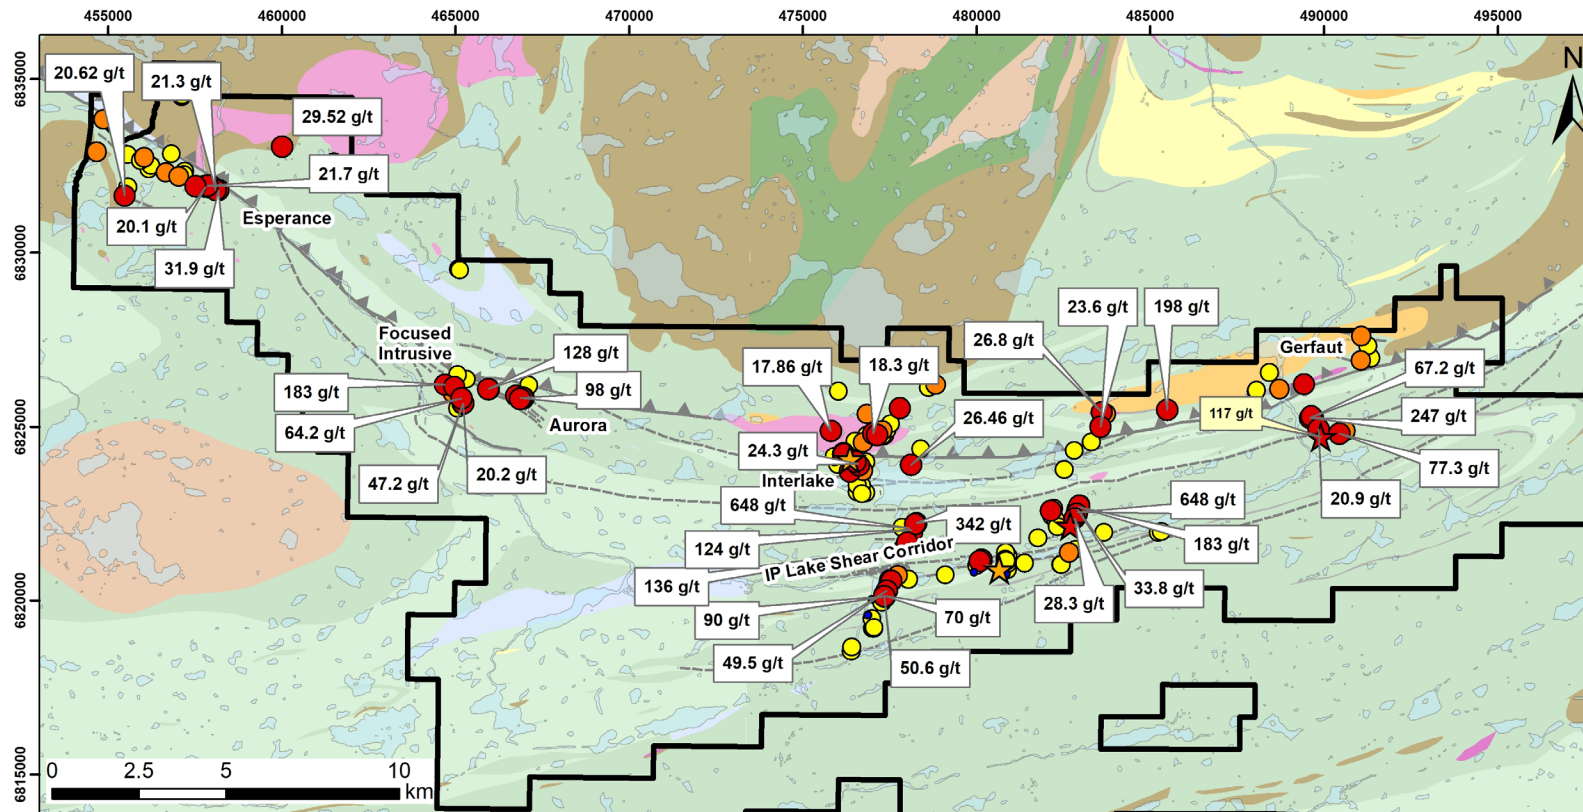

- 100% interest in ~395 km² property
- The northern volcano-sedimentary portion of the Belt remains virtually unexplored
- Gold districts with similar tectonic and age setting to the Cape Smith Belt include¹:
 - Flin Flon/Snow Lake, Canada
 - Ashanti Belt, West Africa
 - Tanami Goldfields, West Australia
 - Tapajos-Parima Belt, Brazil
- More than 12 significant mineralized areas discovered across the property in a variety of geological environments

1. This information is not necessarily indicative of the mineralization on Orford Mining's properties

Qiqavik Gold Project

High grade gold surface showings are prolific across the +40 km long property

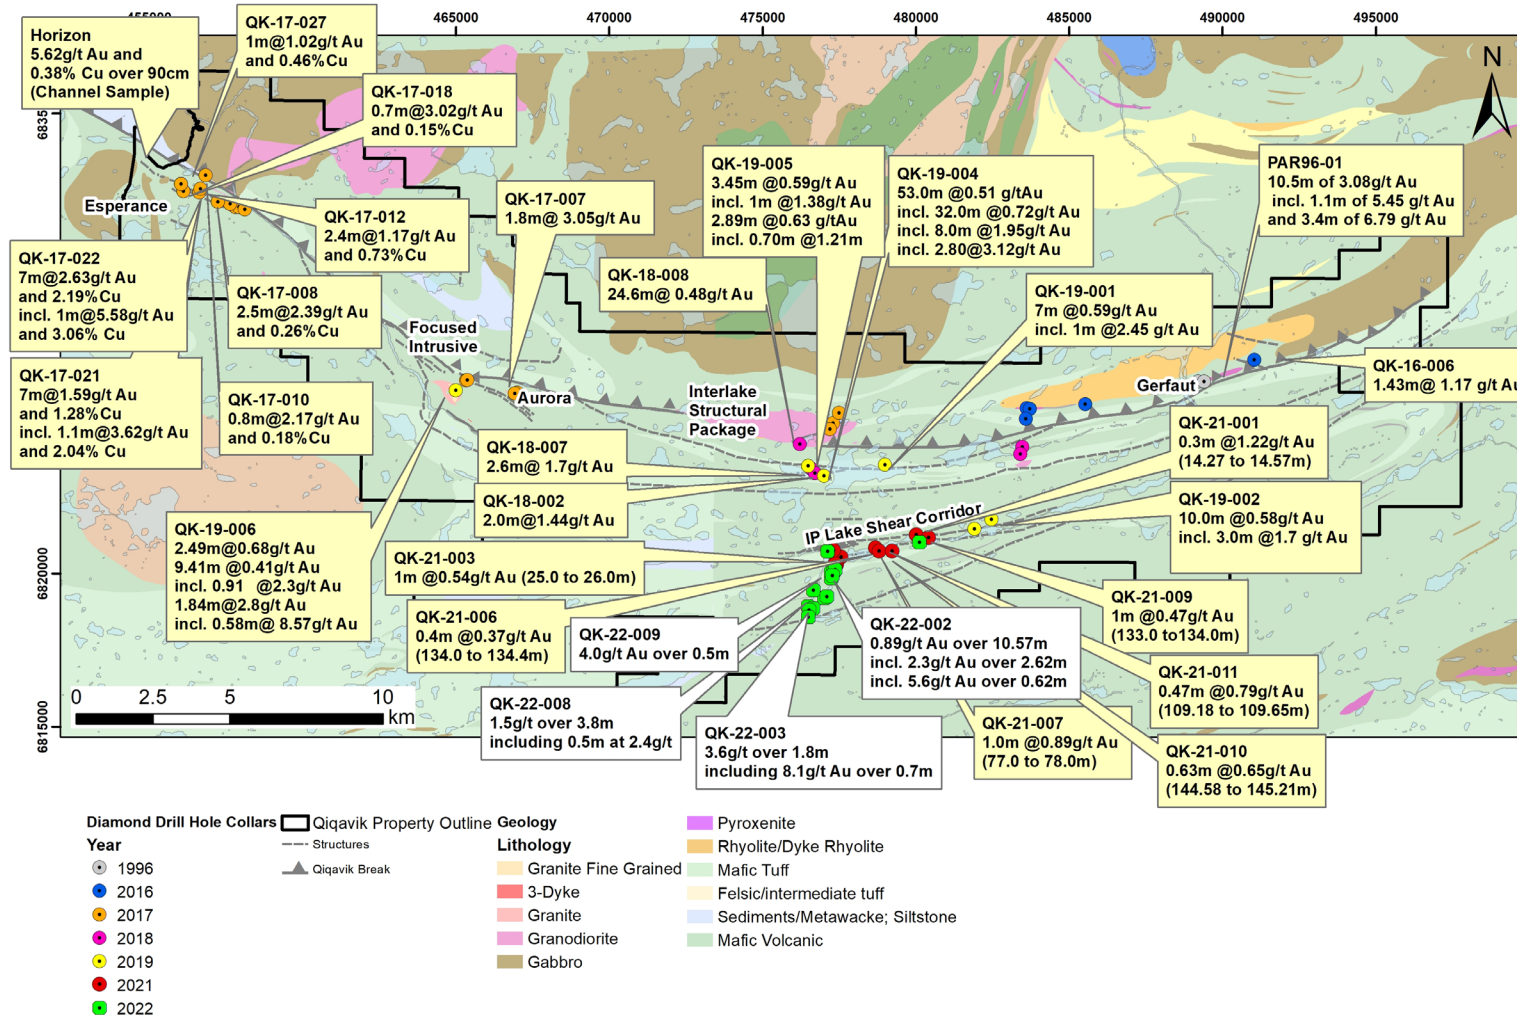

Showing only partial results for 2022 grab samples in yellow (117 g/t in the Gerfaut area), most assays are not available yet.

Note that grab samples are selective by nature and values reported may not be representative of mineralized zones

Qiqavik Gold project– Diamond Drilling Property wide

Gold Mineralization is widespread across the large property in different geological environments

- The 2022 drill program included 14 drill holes and 2,720 metres for a total of 10,948 metres in 70 holes over the 395 sq kilometre property which was increased by 5 sq kilometres this summer to cover the western extension of the Bergeron fault.
- Important to remember there is no historic work other than the two Falconbridge holes searching for nickel and hitting gold.
- In the partial results from the 2022 drilling we have found gold in four of the holes with grades up to 8.1 g/t over 0.7 metres but only a small portion of assay results have come back.

Annick Boulder Train - Search for the Source

Geological mapping, Magnetics, IP survey, VLF survey and till sampling all used to help target the potential source

Sample 167041, example of the Annick Style Samples: Grey quartz – iron Carbonate with veins of massive pyrite and arsenopyrite. Sample reported 49.5g/t Au , found 200 metres south of the IPLS

With grades of up to 648 g/t Au along the Annick boulder train it is a major conduit of gold bearing fluids resulting in spectacular gold mineralization.

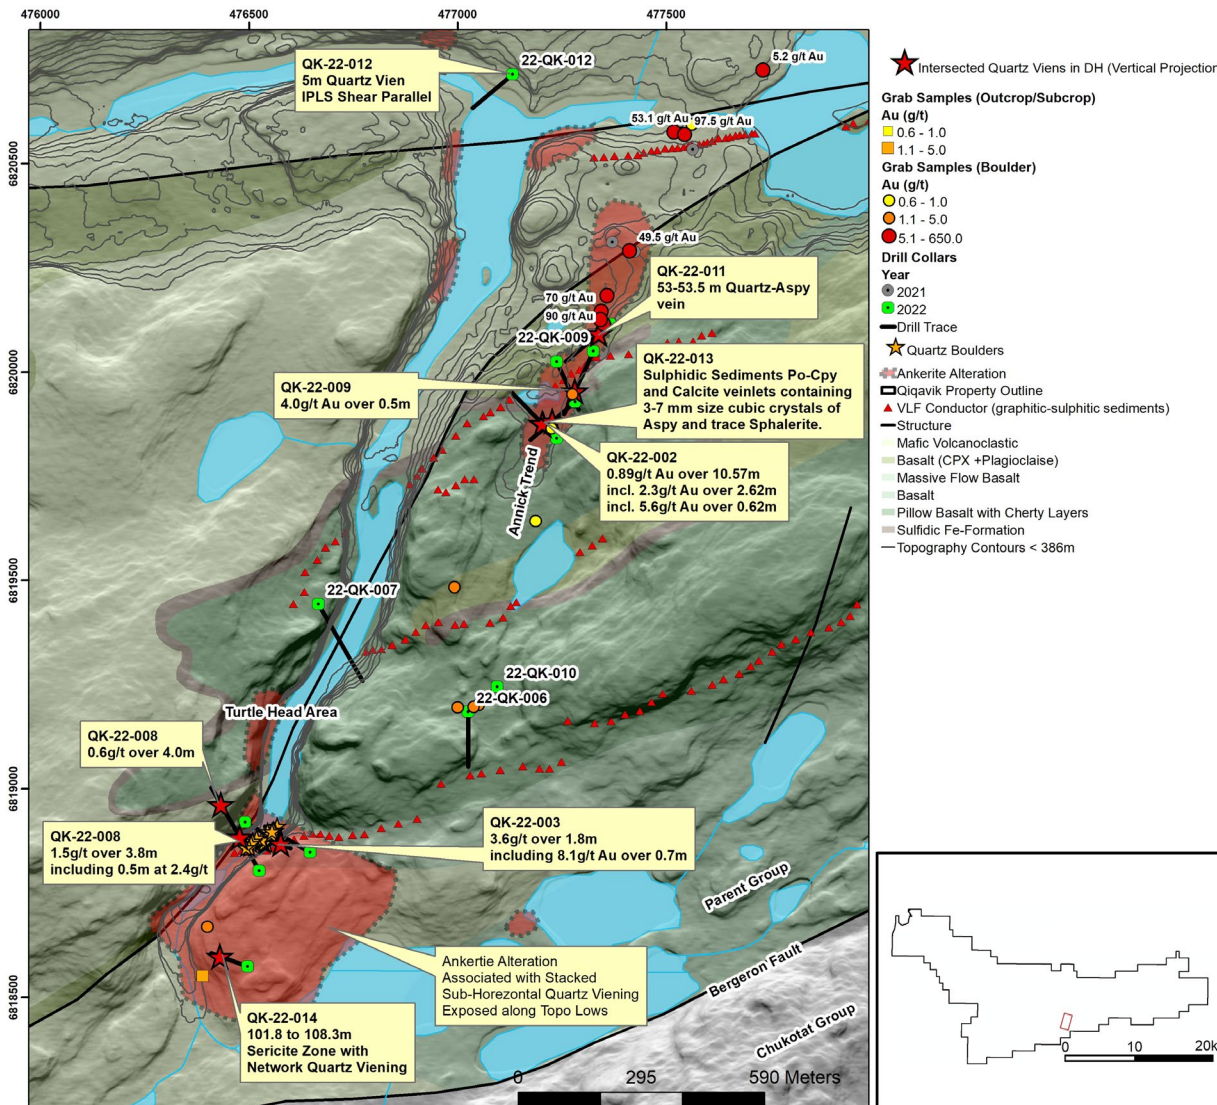

Drilled holes 4 and 5 drilled under pit of 2 m x 2m sized Annick material from east and west, but did not hit the vein.

Note that grab samples are selective by nature and values reported may not be representative of mineralized zones

Qiqavik 2022 Drilling - New Gold Bearing Vein System

The 2022 program was successful in uncovering a gold bearing Quartz-Iron Carbonate-Sulphide alteration system

- Drilled 14 holes, 5 holes were drilled in search of the Annick boulder train source (2,4,9,11,13) and the additional holes (3, 5, 8, 14,) showed that the system may be more extensive with similar mineralization elsewhere.
- Orford has discovered several Quartz – Iron Carbonate sulphide alteration zones with sulphides over a 2 km north south strike length.
- They appear to have a shallow dip and extensive north south, and likely have been impacted by some later extensional structural events.
- We believe we are in the system that produced the high grade Annick boulders because the characterization of the mineralization and quartz – iron carbonate is similar but to date we do not believe we have intersected the Annick boulder material in drill core, although many assays are not completed.

Note that grab samples are selective by nature and values reported may not be representative of mineralized zones. Note that All drilling intervals are down-hole lengths. True thicknesses cannot be estimated with available information

West Raglan Project – High Grade Ni/Cu/Co/PGM Wyloo Metals Earn-in to Large Rich Land Package

Massive 707 km² property in a prolific, yet underexplored region in Quebec

- 100%-owned, advanced stage Ni-Cu-PGE exploration project covering nearly 707 km² in the Cape Smith Belt, Nunavik, Quebec
- Cape Smith Belt is host to prolific high-grade polymetallic nickel deposits and includes two operating mines: Raglan and Nunavik Nickel
- Located ~60 km from Glencore's Raglan Mine
 - Raglan is a first quartile cash cost nickel operation
 - One of the highest ore grades among significant global nickel deposits (Raglan's Proven and Probable Reserves as of Dec. 31, 2021 stood at 9.32 Mt at 2.66% Ni, 0.74% Cu, 0.79 g/t Pt, 1.91 g/t Pd and 0.06% Co (1))
- **Orford executed a earn-in agreement with Wyloo Metals in January 2021 on West Raglan**

(1) Source: Glencore Resources & Reserves Dec 31, 2021

Note: The information disclosed herein in respect of the West Raglan Property is based on the independent report of Clement Dombrowski, P.Geo of IOS Services Geoscientifiques Inc. titled "NI 43-101 Technical Report on West Raglan Project, Northern Quebec, Canada" effective February 20, 2017

Ground views of West Raglan property

Figure 8 P&E Mining Consultants Inc.

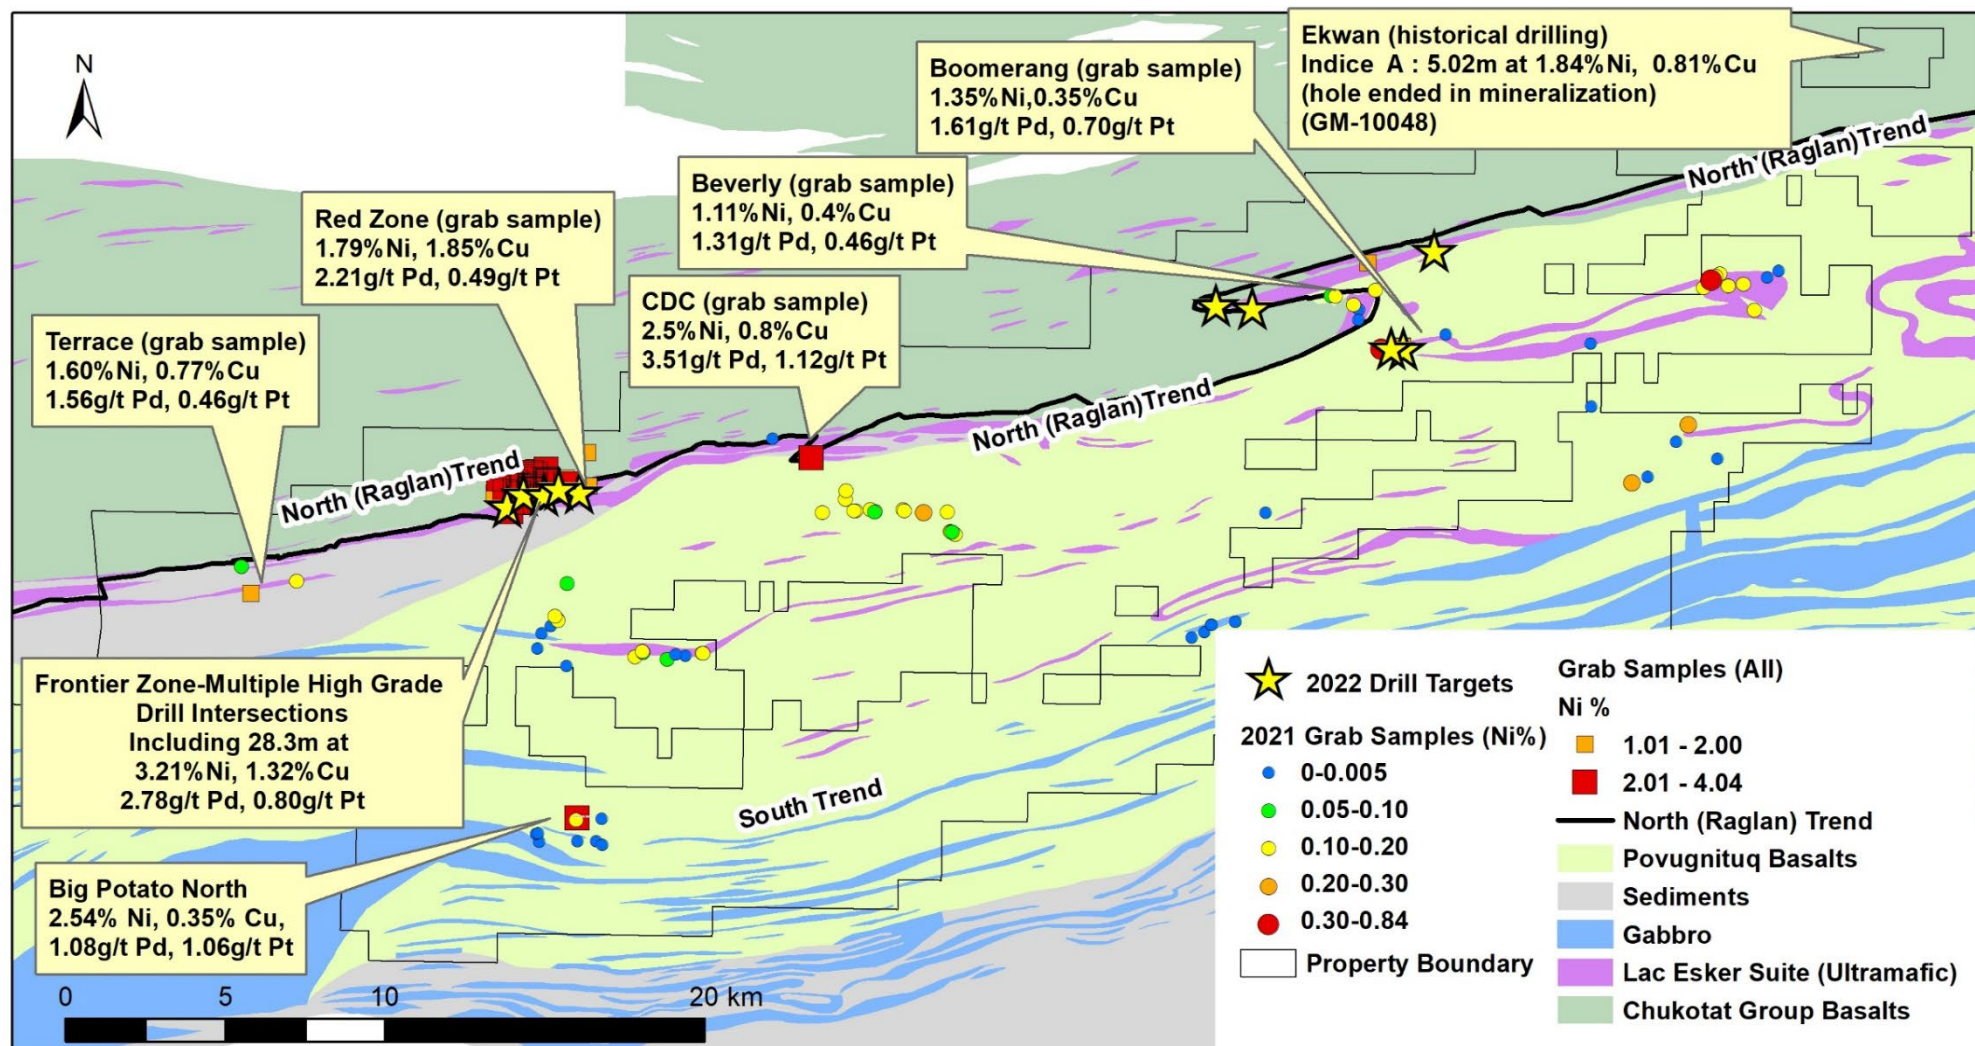

Canadian Royalties' Mequillon deposit is an ultramafic dyke 1.5km x200m (peridotite core, pyroxenite and gabbro on margins, hosts net-textured and massive sulfides (Ni:Cu 1:1)

Raglan Mine hosts 190 individual sulphide lenses in 12 distinct zones; four zones are currently in production feeding a central mill facility (Ni:Cu, 3:1)

West Raglan – Wyloo Earn-in

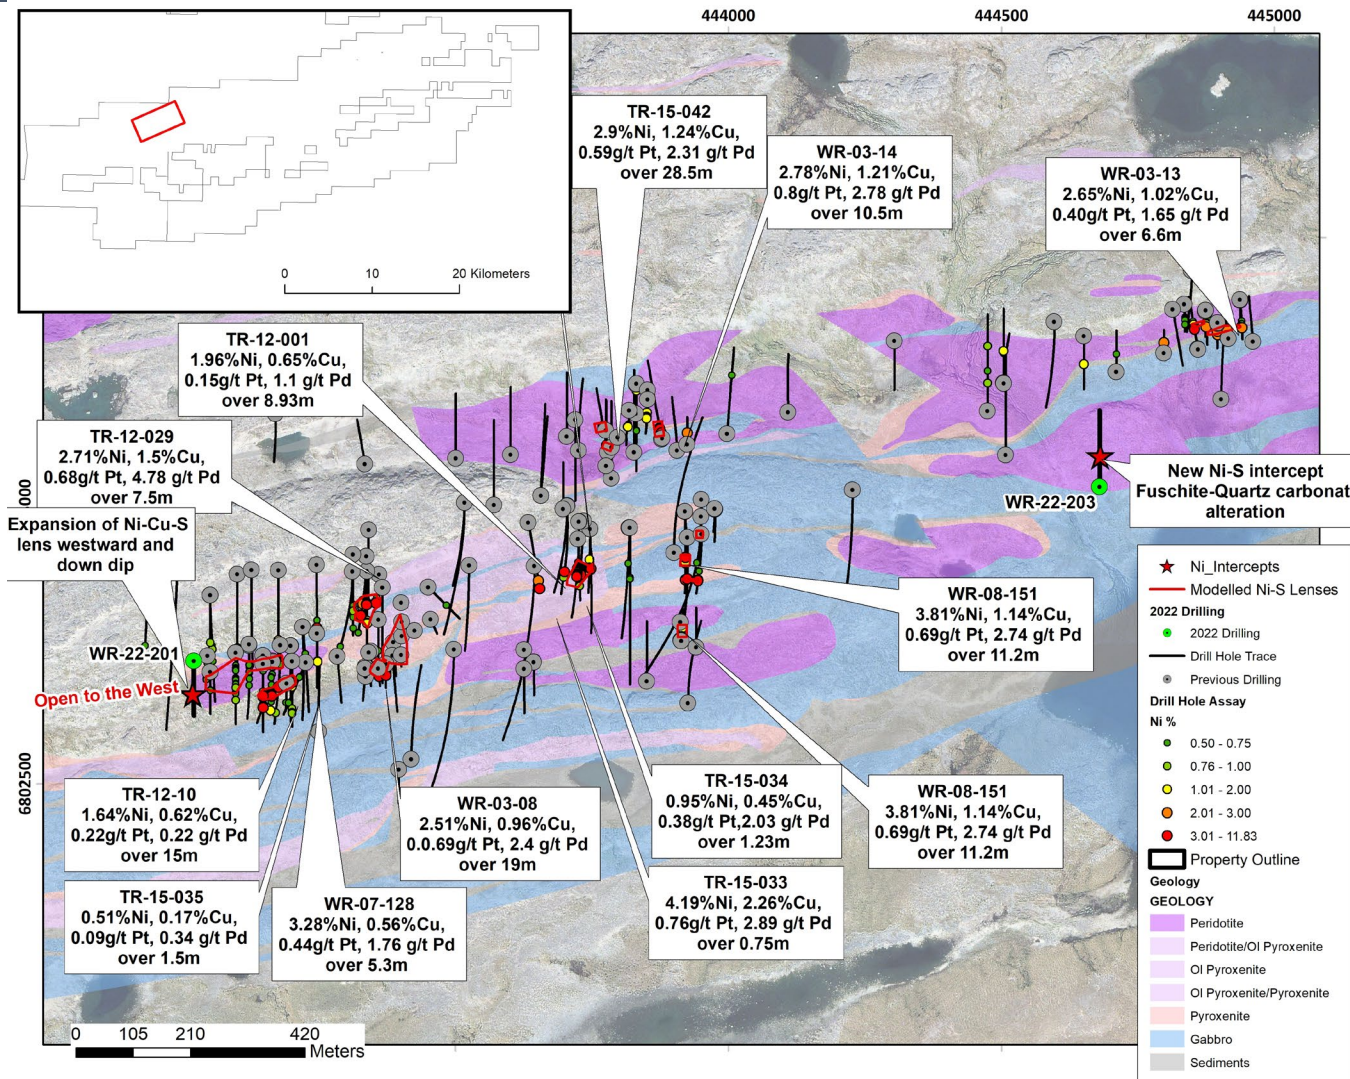

2022 Diamond Drilling program – 2,589 metres in 9 holes testing Squid EM targets

Note that grab samples are selective by nature and values reported may not be representative of mineralized zones. Note that All drilling intervals are down-hole lengths. True thicknesses cannot be estimated with available information

West Raglan Project

Frontier Zone - two holes drilled in 2022 program with Ni sulphide in both

Note that All drilling intervals are down-hole lengths. True thicknesses cannot be estimated with available information

- Historically, the Frontier Area of West Raglan hosts the majority of the West Raglan Drilling
- Several Raglan Styles Nickel-Sulphide pods have been discovered.
- Raglan-type grades and intercepts are shown on this map.
- In 2022 Drilled two extensional type targets on west and east sides with strong SQUID EM targets and both hit nickel sulphides**

West Raglan - 2022 Drilling

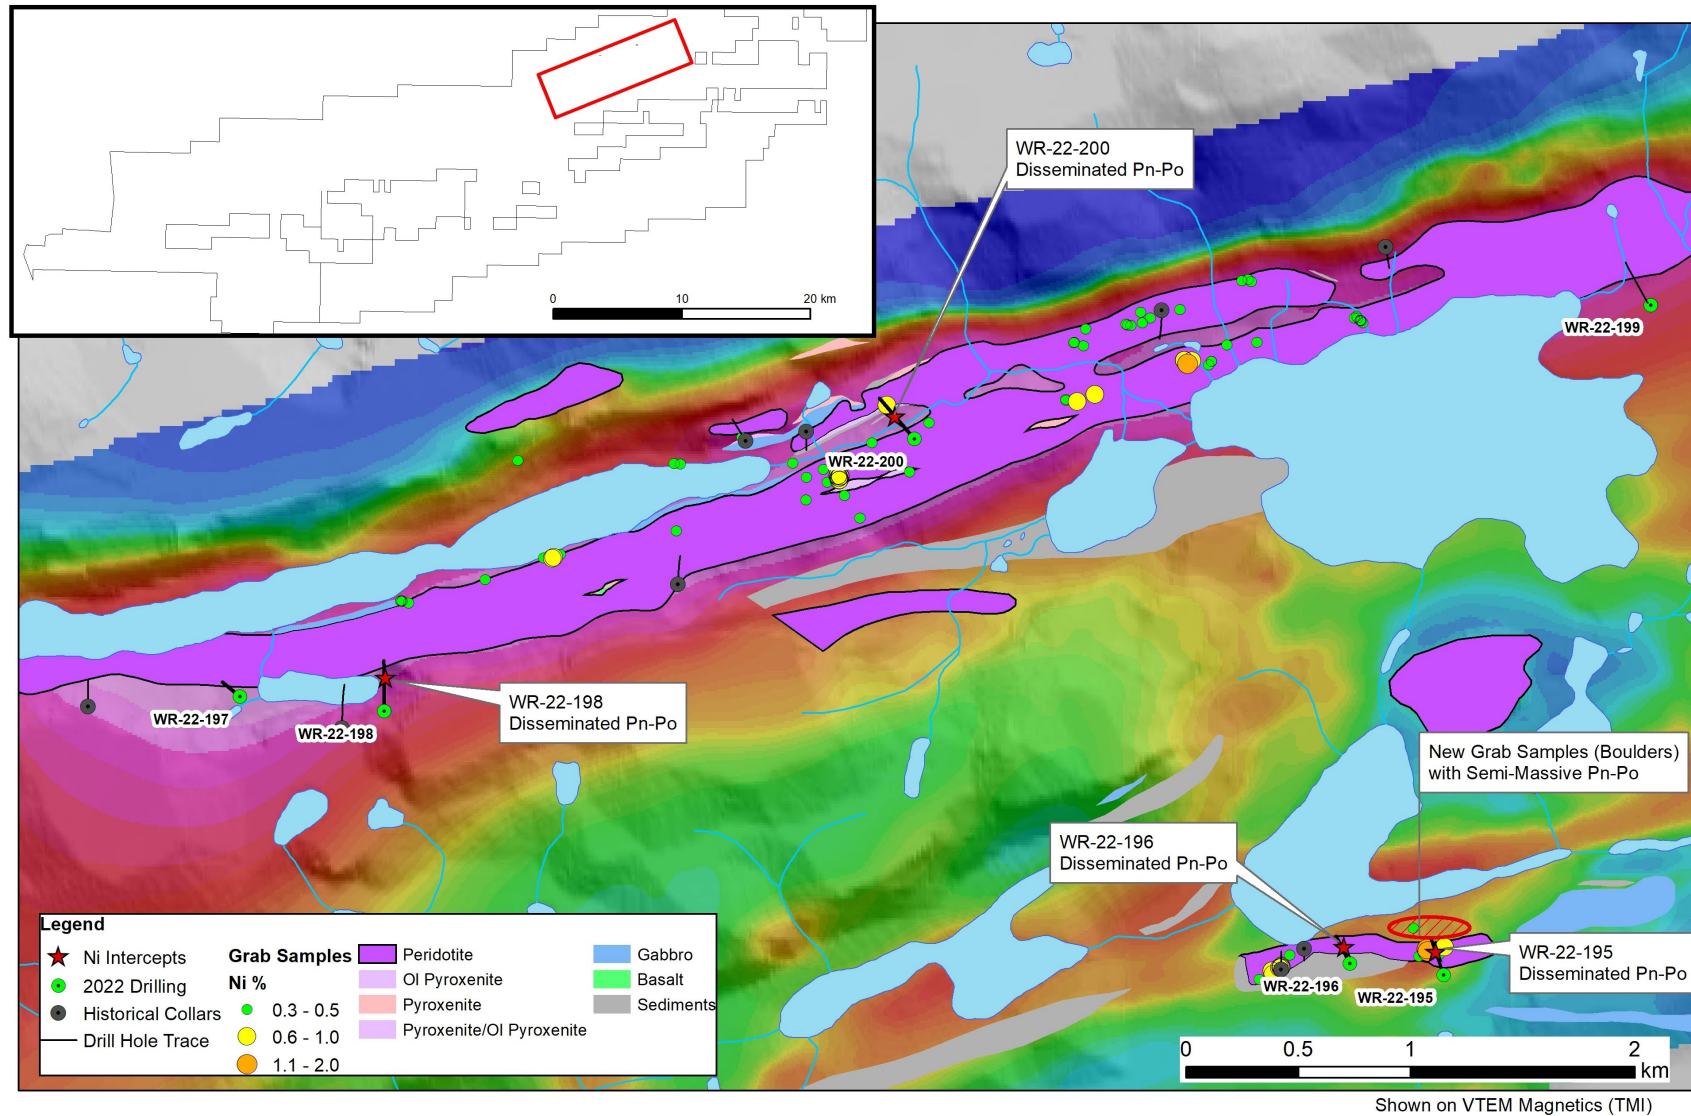

WR-22-203 – Nickel Sulphides in a section of intense fuchsite and quartz carbonate alteration

Partial assays have been received for 22-WR-203 which reported 3.85m @ 0.45%Ni and 0.5g/t Platinum + Palladium from 156m to 159.85m. Only 7% of all assay results have been received to-date

West Raglan – Boomerang and Beverly showings

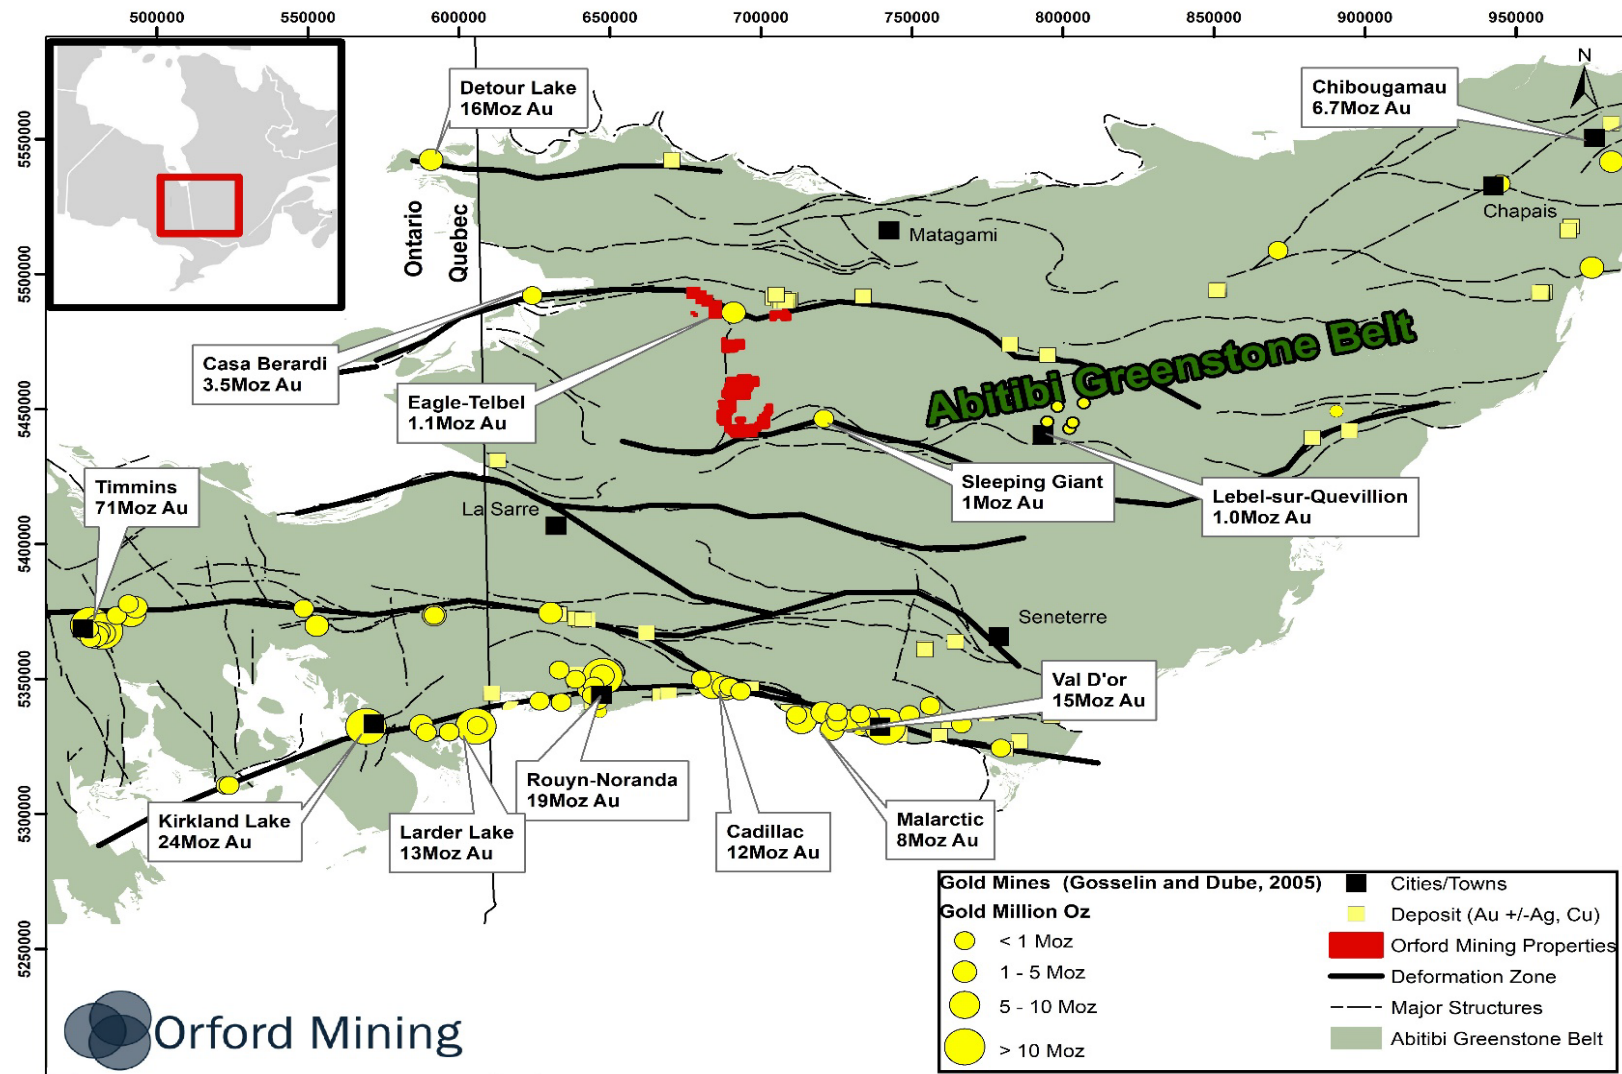

Seven drill holes on new Squid EM targets, four of which hit nickel sulphide mineralization – assays pending

Note that grab samples are selective by nature and values reported may not be representative of mineralized zones.

Orford Takes Major Position in the Abitibi

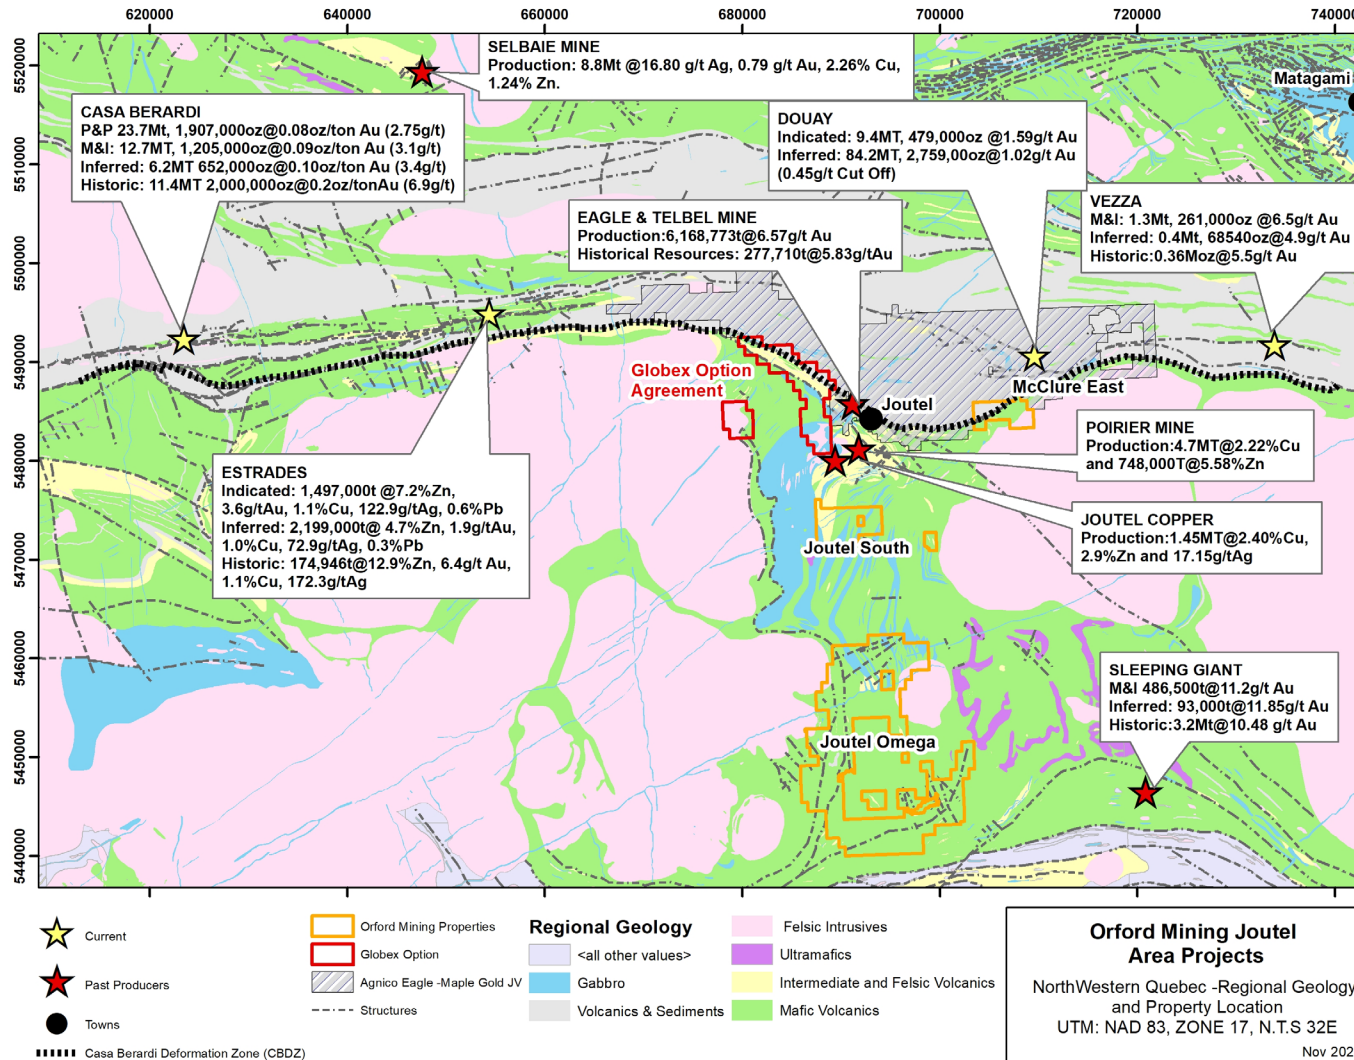

Four properties totalling 260 sq kms in the heart of the Abitibi – Vastly under-explored

This information is not necessarily indicative of the mineralization on Orford Mining's properties

Joutel Area Staking and Acquisitions – 260 Sq Km

Fall 2022 – Airborne EM on Joutel Eagle and Airborne Mag and EM on Joutel Omega

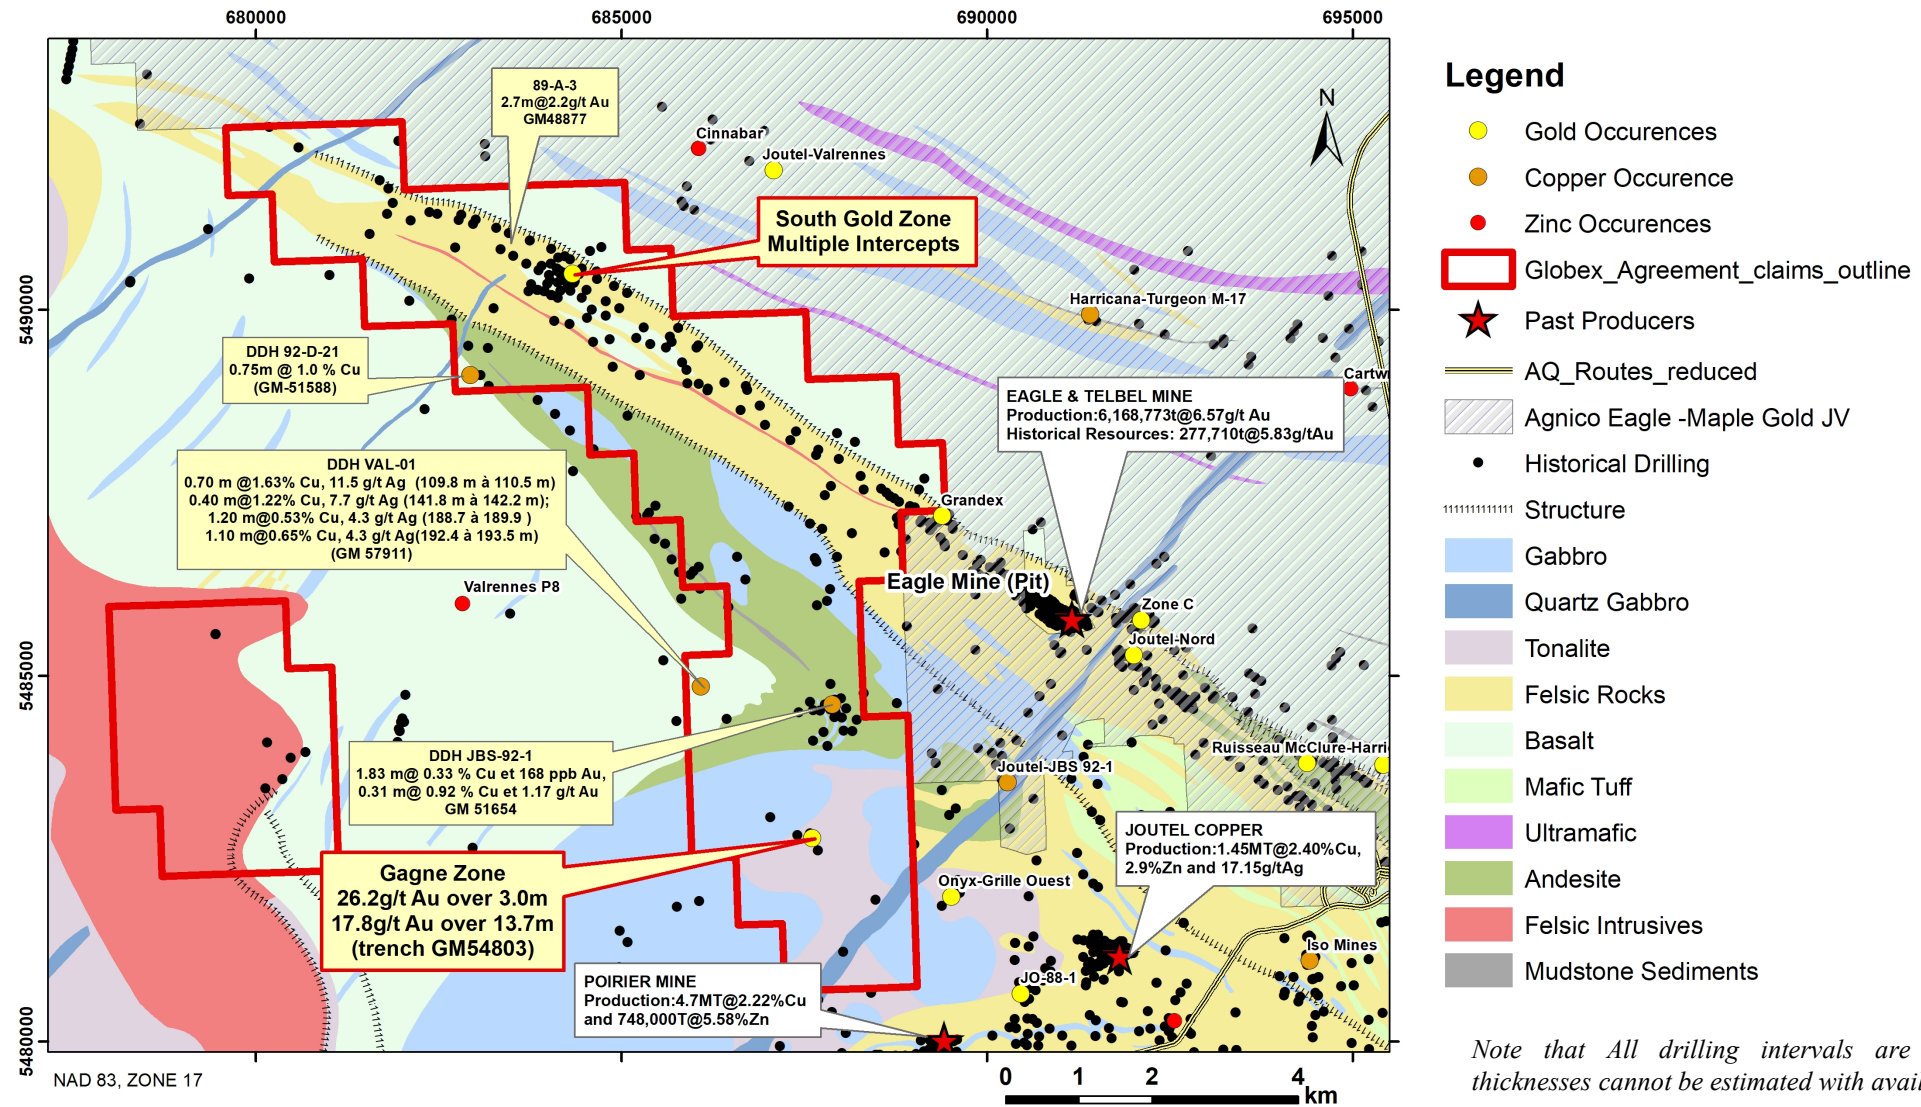

- **The Joutel – Eagle property** is a recently acquired package of 50sq km of claims from Globex Mining enterprises in a 5 year option to purchase. The property sits right on strike to the Eagle Telbel mine and covers 11 kms of the Casa Berardi break.
- **The Joutel South Property** is at the southern underexplored extension of the Joutel felsic volcanic package that hosted both Agnico-Eagle Mines Ltd.'s founding gold mines, Eagle and Telbel, which produced in excess of 1.1Moz of gold¹ and a number of copper assets that have produced 244 Mlbs of copper, 116Mlbs of zinc and 52Mlbs of silver².
- **The McClure East Property** is on the easterly extension of the Casa Berardi structural zone (south splay), which to the west hosts Hecla Mining Ltd's (HL-NYSE) Casa Berardi Mine which has produced 2Moz and has reserves of 3.4M ounces³ and the nearby Douay Gold Deposit held by Maple Gold Mines (MGM-TSXV) that has 422,000 ounces in indicated and 2,532,000 in inferred resources⁴.
- **Joutel – Omega Property** covers the Vanier-Dalet-Priorier Group (VDP) and the Valerennes Volcanic Group (VVG). The latter is part of the Joutel-Raymond volcanic complex that hosts both Agnico-Eagle Mines Ltd.'s (TSX: AEM)

²This information from neighboring properties is not necessarily indicative of the mineralization on Orford Mining's properties.

^{3,4}Système d'information géomineière of Québec "SIGEOM", *Quebec* Ministry of Energy and Natural Resources. April 20,2020

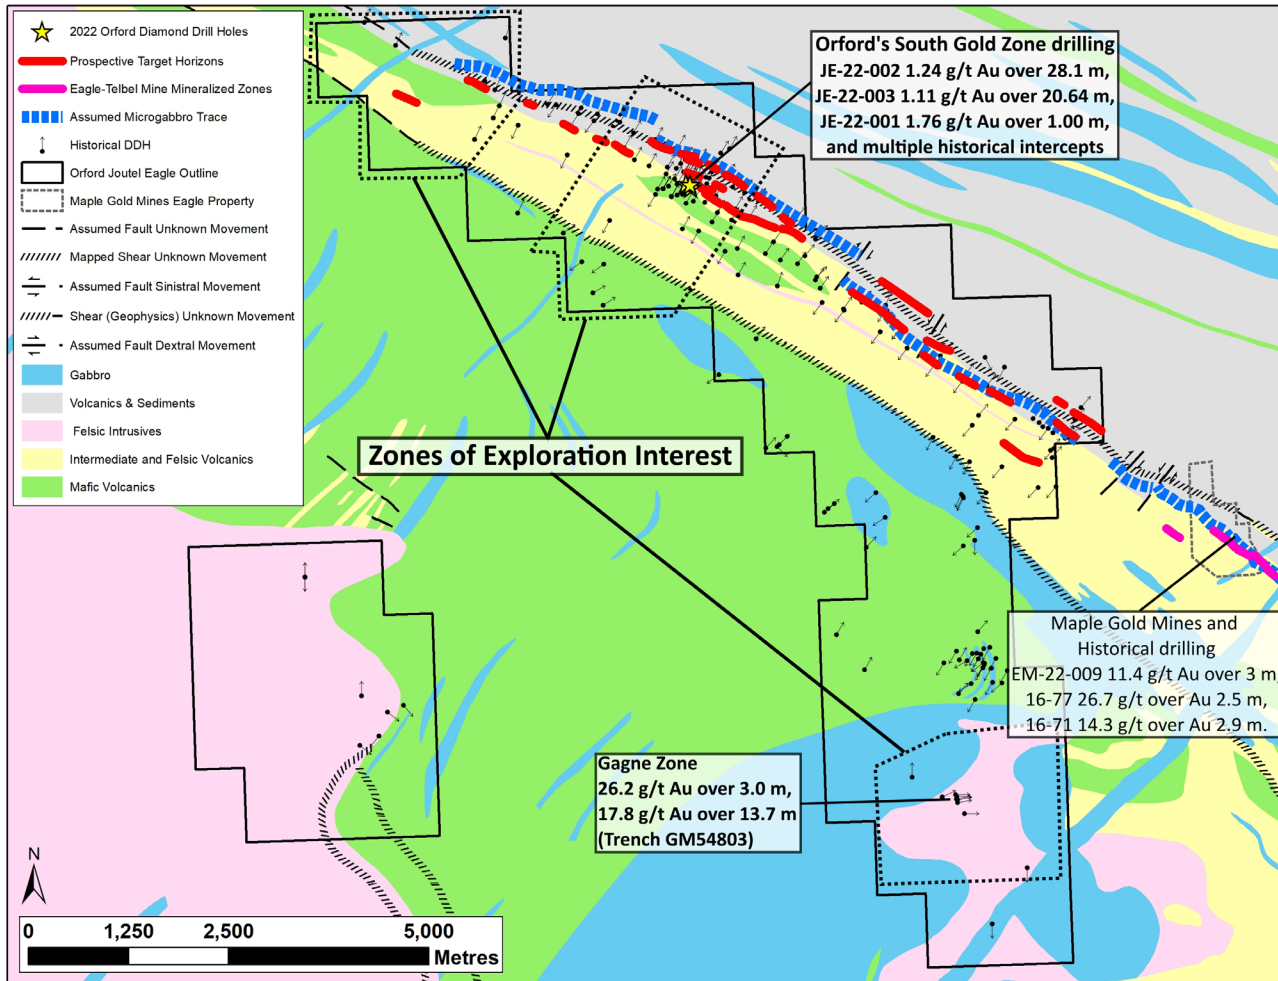

Joutel – Eagle Option

Advanced exploration property next door to past producers

Joutel–Eagle Targetting

Multiple prospective stratigraphic targets

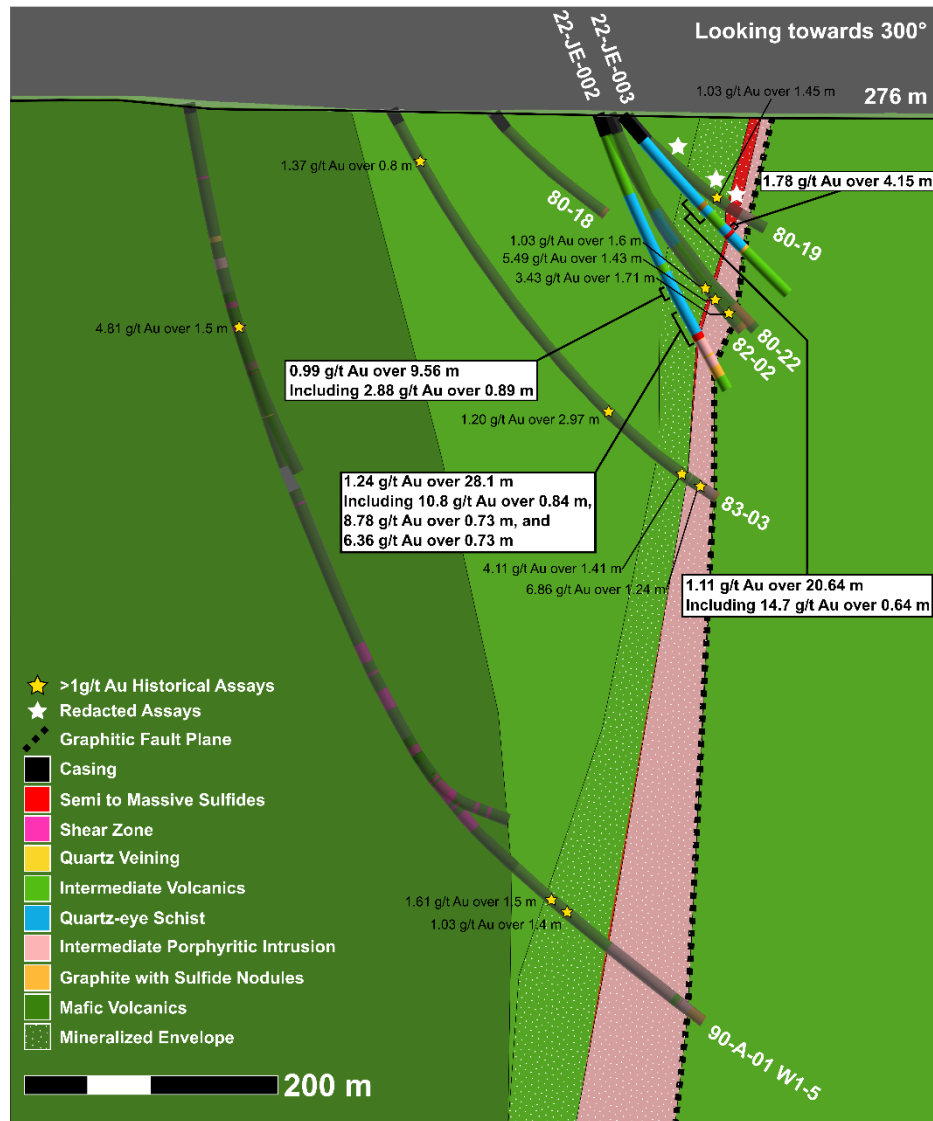

Joutel Eagle Targeting

- Airborne EM to compliment previously completed airborne magnetics and to map out both the marker hanging wall graphitic horizon and the Eagle – Telbel mine horizon massive sulphide.
- Magnetics interpretation of the prospective micro –gabbro intersected in adjacent properties on strike with high grade gold.
- Winter 2023 Drilling program planned.
 - Test South Gold zone
 - Gagne Zone
 - North Western target
 - Microgabbro

See Orford Press release dated May 12 and June 7, 2022 and Maple Gold Mines Ltd Dated August 15, 2022. Note that All drilling intervals are down-hole lengths. True thicknesses cannot be estimated with available information

The historical technical information shown in this image was obtained from historical work reports filed with the Quebec Ministry of Energy and Natural Resources and has not been independently verified by a Qualified Person as defined by NI 43-101. All drilling intervals are down-hole lengths. True thicknesses cannot be estimated with available information. The Locations of historical holes is estimated based on historical georeferenced maps and aerial imagery and the location of 3 historical casings found on the property in 2022.

Joutel – Eagle Gold Project

2023 Drilling plan at South Gold

South Gold 2022 Drilling highlights

- Grades of up to **14.7 g/t gold over 0.64 metres** included in an interval of **1.11 g/t gold over 20.64 metres** were intersected in drill hole 22-JE-003
- An interval of **1.24 g/t gold over 28.10 metres** within a much broader horizon of **0.97 g/t gold over 46.98 metres** was intersected in hole 22-JE-002

South Gold Drilling 2023

- Extend strike length to 400 metres
- Test continuity <300 metres depth
- Test micro-gabbro unit to northwest for high-grade seen on Eagle claim by Maple Gold. This unit is not well tested on the Joutel Eagle property

The historical technical information shown in this image was obtained from historical work reports filed with the Quebec Ministry of Energy and Natural Resources and has not been independently verified by a Qualified Person as defined by NI 43-101. All drilling intervals are down-hole lengths. True thicknesses cannot be estimated with available information. The Locations of historical holes is estimated based on historical georeferenced maps and aerial imagery and the location of 3 historical casings found on the property in 2022.

Fostering strong relationships with government, local communities and First Nations Groups

Open dialog with local communities in Nunavik & Abitibi

Representatives of Salluit, Akulivik and Kativik Regional Gov. (KRG) have visited Camp Chukotat and the West Raglan & Qiqavik Properties

Previous to 2021 (on hold due to COVID restrictions): Working with Salluit & Akulivik Landholding Corporations to hire local workforce during summer exploration programs in Nunavik. Inuit hiring and training in each exploration program.

2021, 12.5% of exploration expenditures were with Nunavik Inuit Enterprises

Identifying and notifying communities and Avataq of archeological sites

Provided in-kind support to KRG for abandoned mineral exploration site rehabilitation in Nunavik

Work with the Coopérative de Solidarité de Pikogan on contracts for the Joutel Area Work

6% of 2021 exploration expenditures for the McClure East and Joutel South properties in the Joutel Area were with the Coopérative de Solidarité de Pikogan

Orford Mining has potentially discovered a new gold district, Qiqavik, next door to its more advanced nickel project, West Raglan, in the highly prospective and underexplored Cape Smith Belt in Northern Quebec

Strong strategic investor support

Massive land position in two underexplored gold districts

Potential discovery of multi-million ounce gold deposits

Strong Financial and Technical Partner on West Raglan Nickel Project

Safe, proven mining jurisdiction

2022 Exploration programs on all four properties in 2022, with over \$9.0 million spent including earn in expenditures by Wyloo on the West Raglan Ni-Cu-PGM Property and most of the assay results are pending

Events

September 13-16, 2022: Precious Metals Summit, Beaver Creek, CO

September 18-21, 2022: The Denver Gold Forum, Colorado Springs, CO

October 3-6, 2022: Explor AEMQ 2022, Montreal, PQ

November 14-15, 2022: The Precious Metals Summit, Zurich Switzerland

News Catalysts

Sept -October 2022 : Remaining Qiqavik 2021 Till Sample Results

October 2022: Qiqavik Drilling Project Results 2022

October 2022: West Raglan Drilling Project Results 2022
